biobean Limited London, United Kingdom
 - Started up their YouTube channel and created thumbnails.
 - Devised, organized and implemented a micro- tagging catalogue of their stock images.
 - Worked up schemes for the company's Instagram engagement to grow.

SKILLS

- **Python** Gained experience through university studies, role at *Mythronics* and personal projects. Specifically with libraries opencv, numpy, pytorch, pandas, transformers.
- **HTML, CSS, PHP** Have created my own custom wordpress theme using these languages for brother's production company.
- **LaTeX** Language used to format documents, gained experience through university studies (this document was created in LaTeX).
- **Unix/Linux** Daily personal use on home computer and experience from work at *Mythronics*.
- **Computer Vision** Gained experience from *Mythronics* in labelling image data, preparing data for training (including generating synthetic data) and executing training with YOLOv4 and MaskRCNN networks. Also devised my own strategy for tracking objects in inference. .
- **Marketing & Content** My work at *biobean* dealt with editing and captioning social media posts and creating new content. Have also had experience growing and selling theme related social media pages as well as video editing experience from my internship at *Hireworks* and personal projects.
- **Organisation** I consider myself an organised person on a day-to-day basis; proof of this within a work environment can be shown through my work at *Studio Wilson Copp* and *biobean Limited*.
- **Writing & Communication** Was awarded A*'s in English Language and English Literature at IGCSE as well as an A* in English GCE A Level; my writing has proved to be an asset throughout all of my work experience. I am a very sociable person and extend this effort in work environments.
